

Community Work Plan for Diabetes	
CHNA Page Reference – pages 42-43	
Health Problem	Outcome Objective
Diabetes	<ul style="list-style-type: none"> • Reduce diabetes incidence rate
<p>The diabetes incidence rate in Upson County (13 percent) was higher than the health district rate (11.4 percent), higher than the State rate (9.7 percent) and higher than the U.S. rate (8.7 percent).</p>	
<p>Related Healthy People 2020 objectives:</p> <p>D-1 Reduce the annual number of new cases of diagnosed diabetes in the population</p> <p>D-3 Reduce the diabetes death rate</p>	
<p>Implementation Strategies to reduce contributing factors:</p> <p>The hospital will provide diabetes education on disease management and nutrition throughout the community. It will also provide blood glucose screenings at community health fairs, offer an exercise class for individuals living with or at high-risk of developing diabetes, and provide insulin to uninsured and underserved patients. The hospital will provide one-on-one consults upon MD referral about diabetes disease management. The hospital will also provide additional education and awareness on diabetes via their website: www.urmc.org. The hospital will provide services in locations that are easily accessible by the low-income, minority and other vulnerable populations.</p>
